ARJUN SURESH

Frontend Developer With Angular | Angular Developer | Nodejs
Developer
Kochi, Kerala, India

Summary

As a MEAN Stack Developer at Brototype, I create powerful web applications with Angular, Node.js, MongoDB, and other technologies. I have been working there since April 2023, and I have contributed to several projects, such as developing a dashboard for managing customer feedback, integrating APIs for third-party services, and optimizing the performance and security of the application.

I have a Diploma of Education in Mechanical Engineering from Malabar Polytechnic Campus, where I graduated in March 2021. I also have a strong foundation in Data Structures and Algorithms (DSA), JavaScript, Ajax, Git, and SQL, which I have demonstrated in various certifications and courses. I'm passionate about programming, and I'm always looking for new ways to solve problems and create new experiences for users. If you're looking for someone with a passion for programming and a commitment to learning, let's connect!
